

NC Burn Surge Disaster Program

Contributed by Lyle Johnston
Last Updated Thursday, 30 July 2009

The North Carolina Burn Surge Disaster Program is based upon the premise that historical catastrophic events have occurred and produced significant burn and blast injuries. Current burn beds are routinely running at capacity both within our state and across the nation. With the likelihood of these events occurring in the future, there is distinct necessity for better preparedness for these likely events.

Information about this program can be found at the following website. www.ncburndisaster.org. There are many educational and informational sections on this website, including information about upcoming Advanced Burn Life Support (ABLS) Courses.
